About the Program

Research is essential to find out which treatments work better for patients. It plays an important role in discovering new treatments, and making sure that we use existing treatments in the best possible ways. Research can find answers to things that are unknown, filling gaps in knowledge and changing the way that healthcare professionals work. Some of the common aims for conducting research studies to diagnose diseases and health problems, Improve the quality of life for people living with illness. Day by Day training to hospital staff, teaching staff is very essential for knowledge upgradation.

- Seats are limited, so registration will be given on first come first serve basis
- Certificates will be provided for all those participants who will complete the PDP successful
- Detailed schedule day to day will be shared separately to registered participants
