

Shivam Kumar

I am excited about the opportunity to find a challenging position in a reputable company where I can expand my skills and knowledge. I believe that my experience and knowledge about the industrial IT field, along with my attention to detail, will be valuable assets to any team that I am a part of. Thank you for considering me for any opportunities that may arise.

SKILLS

Java Android Studio Excel Sql

PERSONAL PROJECTS

Food SAVER

- It is an Android application that helps to save the food. We see food wastage every day from restaurant, home, offices and also see many people in sleep empty stomach. This application helps to connect people to NGOs. The technology used in this project is Java, Android Studio and FireBase for authentications

Courier Tracking system

- Customers can track his/her order, to where the courier has been reached just by logging in and entering the courier number to track the location of the package. Here we propose a dedicated courier tracking system where customers may check the status and location of his/her courier. The technology used in this project is python, Django framework and MySQL database .
