

Prasanna Jadhav

Core- Java | Advanced Java | J2EE|Hibernate/JPA | Spring-Framework | Spring Boot | MY-SQL | HTML | CSS |
JavaScript | Python | Data Visulation with Python | IBM Watson| Cloud Computing | DevOps | Docker |
Kubernetes

Key Expertise

- Proficiency in Core-Java, Advanced java, J2EE, JDBC, HIBERNATE/JPA, Spring and Spring Boot, Restful API, Python, Data visualization with Python and Cloud computing.
- Thorough knowledge of Html, CSS, JavaScript, Node-JS.
- Good Knowledge of cloud computing and deep down into IBM cloud.
- Deep Understanding of IBM watson services.
- Expert-level knowledge of java programming, Python and SQL.
- Worked in web Applications development using Java technologies .
- Good knowledge on Performing CRUD operations in SQL and Data JPA.
- Good and architectural knowledge on JDBC , ORM tools and Loose coupling.
- Good knowledge on Spring MVC Architecture.
- Build java projects using hibernate, spring framework, spring boot .
- Good Knowledge of MySQL and MongoDB.
- Good Knowledge of data visualization tools like Power BI, Tableau.

Experience

- 4 years and 2 months of experience in Training & Development with Cloud computing, Java Technologies and Python.

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

Prasanna Jadhav

Core- Java | Advanced Java | J2EE|Hibernate/JPA | Spring-Framework | Spring Boot | MY-SQL | HTML | CSS |
JavaScript | Python | Data Visulation with Python | IBM Watson| Cloud Computing | DevOps | Docker |
Kubernetes

Certifications:

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

Experience

- 4 years and 2 months of experience in Training & Development with Java, Other Java technologies with frameworks and Python.

- **Project Name:** Food delivery chat-bot using IBM Cloud Watson
- **Description:**
 - Using the chat bot user can take the advantages of chatting with a chat-bot.
 - Here we use IBM Watson technologies
 - Many intents with entities with various dialog nodes are added
 - For user experience we add that to a sample website using IBM new experience
- **Tech-Stack:** IBM Watson technologies

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

- **Project Name:** Easy Trip

- **Description:**

- A Trip Management System is a software application that allows users to plan, organize, and manage various aspects of their trips, such as destinations, travels, bookings

- **Features:** Login and Logout module | Admin module | Customer module | Trip package booking | Bus booking | Bill details

- **Tech Stack:** Java, Spring Boot, Spring data JPA, Hibernate, MySQL, Git

- **Project Name:** Cab Mate

- **Description:**

- REST API for an Online Cab Booking application, Which performs all the fundamental CRUD operations of any Cab Booking platform with user validation at every step.

- **Features** - Login and Logout module | Admin module | Customer module

- **Tech Stack:** Java, Spring Boot, Spring data JPA, Hibernate, MySQL, Git

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

- **Project Name:** ShopZiel
- **Description:**
- Shopziel is an e-commerce application developed using Java Spring Boot, MySQL, Hibernate for the backend, and React for the frontend. It is designed to provide a seamless and user-friendly shopping experience for both customers and sellers.
- **Features:** User Authentication & Authorization | User Module | Product Module | Category Module | Cart Module | Order Module | Bill Module

- **Tech Stack:** ReactJs | Chakra ui | JAVA | SpringBoot | Spring Security | Hibernate | Maven | MySQL | Swagger

- **Project Name:** FathomHealth.com clone
- **Description :**
- fathom health website which provides an AI build service for medical coding.

- **Features:** Meeting Scheduling | Responsive web design

- **Tech Stack:** HTML, CSS, JavaScript, Git

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

- **Project Name:** COVID-19 Dashboard

- **Description:**

- A COVID-19 dashboard that provides up-to-date information on cases, vaccinations, and trends. Use data from reliable sources like the World Health Organization (WHO) or the Centers for Disease Control and Prevention (CDC).

- **Features:** Case Statistics | Vaccination Statistics | User Interactivity

- **Tech Stacks:** Python, libraries like Matplotlib, Plotly.

- **Project Name:** Healthcare Data Visualization

- **Description:**

- Analyze healthcare data, such as patient records or disease statistics. Create visualizations to understand disease prevalence, treatment outcomes, or the impact of various factors on health.

- **Features:** Case Statistics | Vaccination Statistics | User Interactivity

- **Tech Stacks:** Python, libraries like Matplotlib, Plotly.

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months

▪ TECHNICAL FORTE

- **Programming:** Java, Python, SQL
- **Java Technology:** JDBC, J2EE, HIBERNATE&JPA, SPRING, Spring Boot
- **Tools/IDE:** Eclipse, IntelliJ-ide, VS-Code, STS, Sublime text, IDLE, Jupyter Notebook, MySQL, GIT
- **RDBMS:** MY-SQL
- **Web Technology:** CSS, HTML, JavaScript, NodeJS
- **OS:** Windows 10+

PERSONAL SNIPPETS

- **Languages Known:** English, Hindi, Marathi
- **Nationality:** Indian
- **Hobbies:** Travelling, Learning new technologies

Qualification

- MSc Computer Science

Training Experience

- 4 years and 2 months
