

Report on One Day Webinar

On

“Making of the Indian Rotavirus Vaccine”

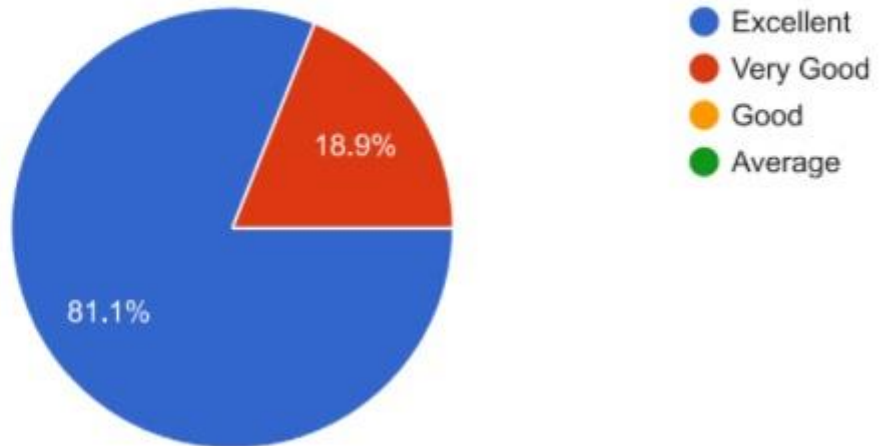

A One Day webinar was conducted by the collaboration of the Department of Bioengineering and Biosciences, Integral University, Lucknow on 24th February, 2022. The event was conceptualized and well coordinated by Dr. Alvina Farooqui, Associate Professor and Head, Department of Bioengineering. The webinar was conducted through Google meet platform and was hosted by Dr. Namrata Mitra, Assistant Professor, Department of Biosciences. The webinar began with the welcome note by Prof. Sher Ali, Distinguished Professor and Head, Department of Biosciences.

The eminent speaker for the webinar was Prof. Sudhanshu Vrati, Executive Director, UNESCO Regional Centre for Biotechnology, Government of India, New Delhi. He enlightened the participants with the necessity of rotavirus vaccine for Indian children as Rotavirus infections cause severe diarrhea in young children. He explained the process of vaccine development in a very simple and lucid manner which enabled the participants to grasp the concepts easily. He answered the queries put forward by the participants.

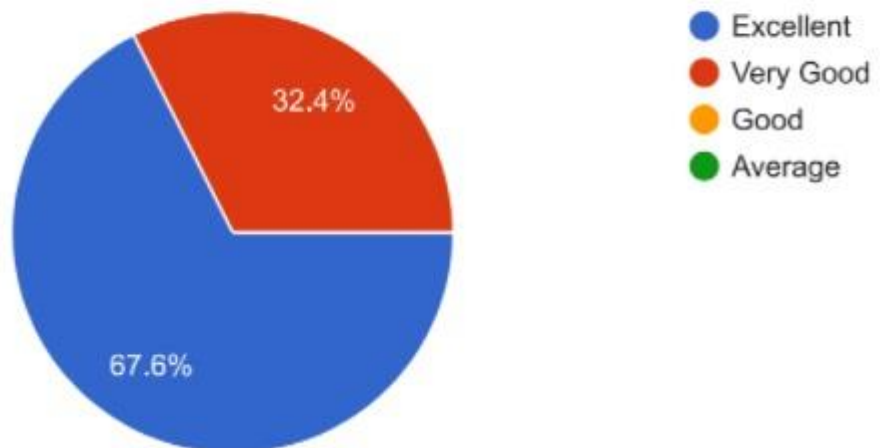

The webinar concluded with the Vote of Thanks by Prof. Iffat Zareen Ahmad. More than 100 students showed active and enthusiastic participation in the webinar making it a success.

Feedback of the participants

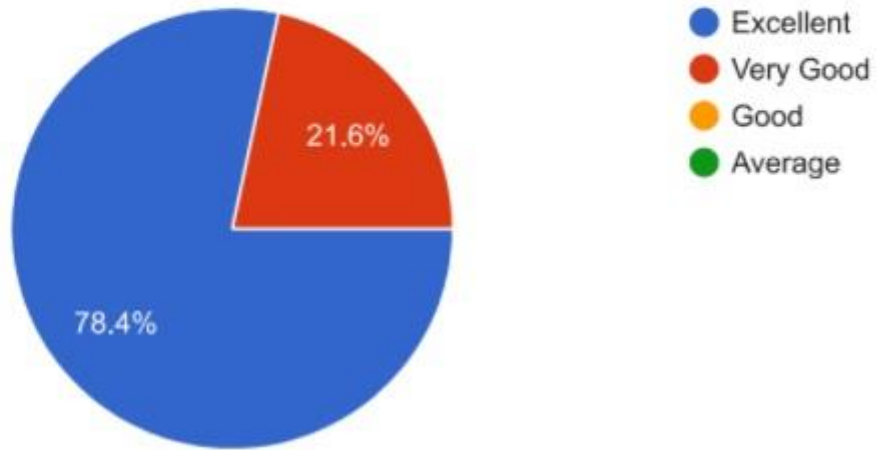

1. Theme and content of Webinar

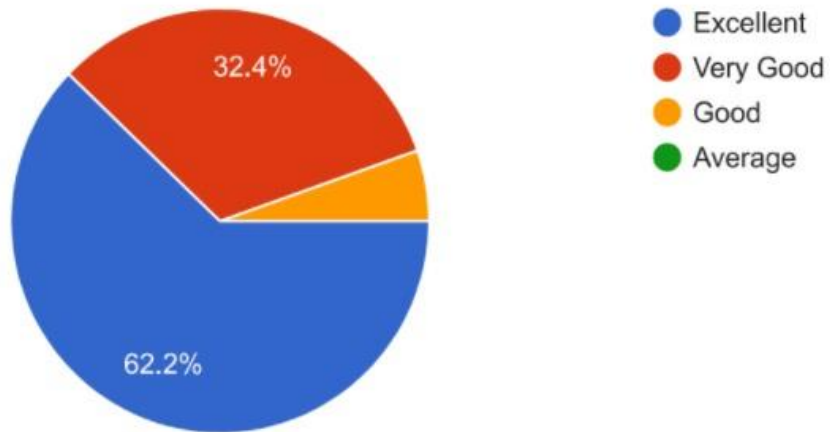

2. How would you rate the Webinar.

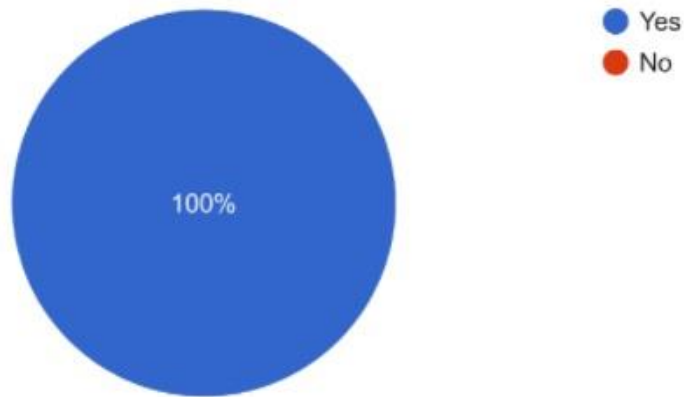

3. The relevance of information and skills presented:

4. The webinar provided adequate time for questions and answered them satisfactory.

5. Did the information shared under this webinar upgrade your existing knowledge ?

Glimpses of the event
