A career in defence forces promises one of the most prestigious and respected positions in the country. Youngsters who aspire to choose a career of excitement, adventure, and challenges can find no better place than defence to meet all their professional expectations. The Indian Armed Forces are the military forces of India which consist of four professional uniformed services: The Indian Army, Indian Air Force, Indian Navy and Indian Coast Guard. The various paramilitary organisations and various inter service institutions also help the Indian Armed Forces. The Ministry of Defence is responsible for the management of armed forces in India.
