A brief report on short skits/films/sketches organised by the Department of Pharmacy, Faculty of Pharmacy

On August 23, 2023, India created history when ‘Chandrayaan-3’, the third mission in the Chandrayaan programme, by the **Indian Space Research Organisation (ISRO)** successfully landed near the lunar south polar region, making India the fourth country to land on the Moon and the first to do so near the region of the lunar south pole. The mission opened the doors to new space explorations on the lunar surface, subsurface and atmosphere, and to demonstrate India’s technological capabilities in space.

In view of this successful moon-landing by Chandrayaan-3, to celebrate and commemorate India’s historic achievement, the students from various courses at the Faculty of Pharmacy, Integral University under the aegis and guidance of **Prof. Syed Misbahul Hasan, Dean** and **Prof. Juber Akhtar, Head of the department** organized various events like Poster presentation, Speech or Extempore and recorded Videos on various themes like:

- ‘India on Moon’
- ‘New India on Moon’
- ‘Moon is not far away’
- ‘Lunar Journey of New India’
- ‘Self-reliant India’s Chandrayaan’

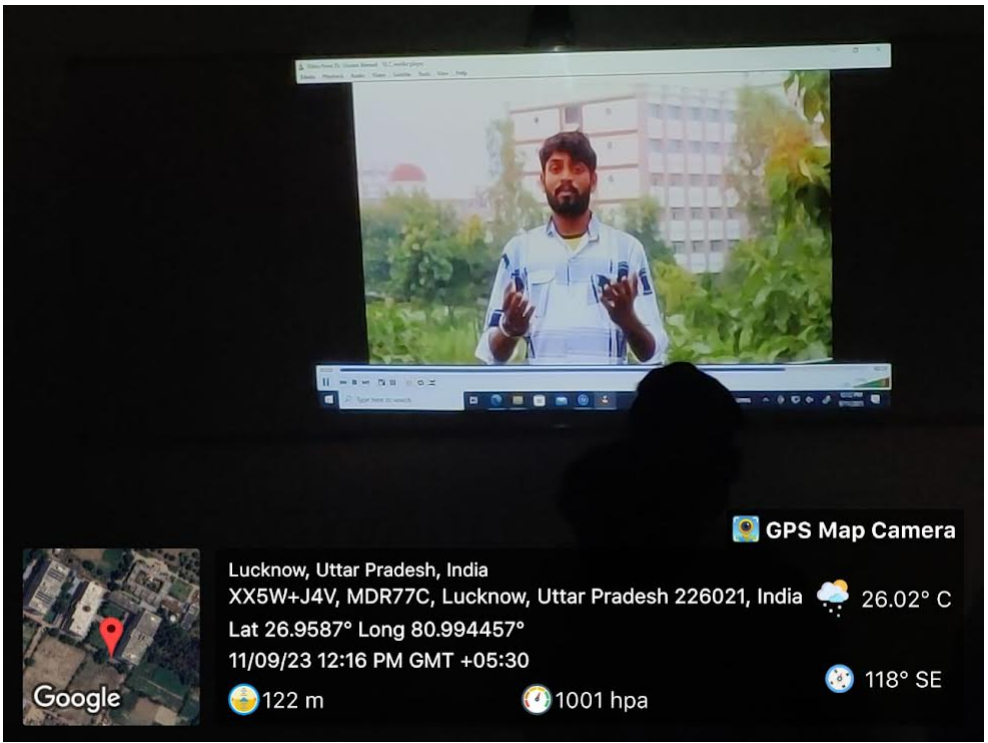

The students were further guided on the execution of their ideas by the faculty members at the Department of Pharmacy, where, **Dr. Usama Ahmad, Associate Professor, Dr. Arshiya Shamim, Associate Professor-II, Dr. Resu Tiwari, Assistant Professor** and **Ms. Shabana Khatoon, Assistant Professor**, gave their insights to the students so they can execute their ideas in the most effective ways and coordinated with other students who attended various events as spectators. There were around 125 students from various courses of the department who marked their presence in these events.

The students were enthused with the spirit of India’s scientific advancement and showcased their take on this one-of-a-kind success journey of our country. **Mr. Asim Rahman** of **B.Pharm Third year** gave an exemplary speech on how India became the first country to land on the south pole of the moon. His words were full of enthusiasm and happiness for this achievement and he highlighted the pivotal role of ISRO in making the country proud.

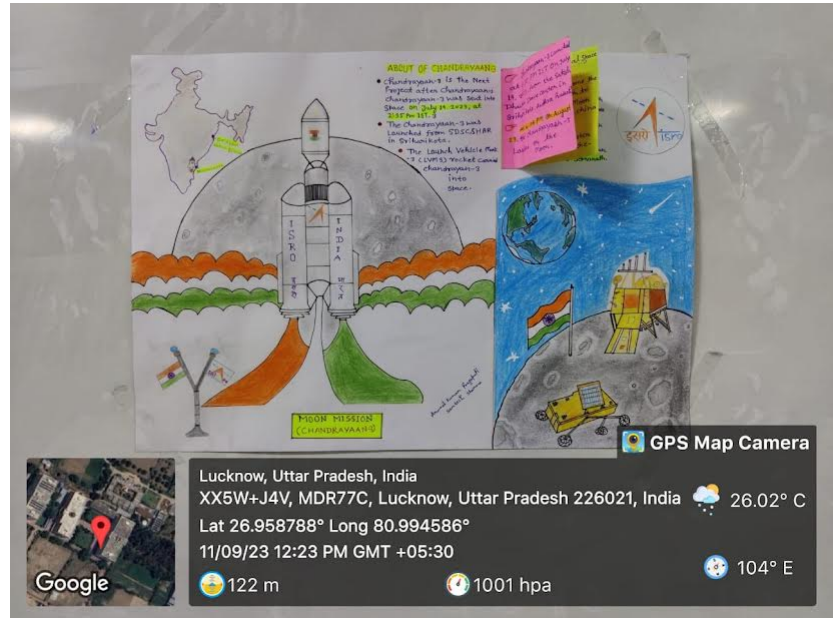

The students from **D.Pharm Second year, Shivam K Gupta, Anand K Prajapati, Santosh Sharma, Jahid Ansari and Asad Khan** made short video compilation expressing their views on how this success would shape India's new and bright future and would open world's new gateway to lunar success.

Maneesh Jaiswal D.Pharm Second year and Md Nadeem Sarvar and Karuna Shankar of B.Pharm Fourth year also presented beautiful posters on the same theme. Their posters demonstrated India's glorious achievement.
