Announcement for Extension Activity

We're delighted to announce that the Department of Biosciences, in partnership with NSS is organizing a special awareness and sensitization program on **Aadhaar-based Health Authentication (ABHA / Health ID card)** as part of the **Ayushman Bharat Digital Mission (ABDM)**. The ABDM is an agency of the Government of India that aims to develop the backbone necessary to support the integrated digital health infrastructure of the country via bridging the existing gap amongst different stakeholders of the Healthcare ecosystem through digital highways. This event will take place on **May 13, 2024, at Paikramau, an adopted village of Integral University under Unnat Bharat Abhiyaan**. This collaborative effort also involves the esteemed **Yeh Ek Soch foundation (NGO)**. The program will feature active participation from students of the Department.

As a values-driven educational institution, our focus extends beyond mere knowledge dissemination. We believe that fostering a strong sense of community service is integral to the holistic development of our students. Through value-based education, we cultivate a closely-knit community where individuals support and care for one another. We wish to emphasize the significance of Aadhaar-based Health Authentication (ABHA / Health ID card) in facilitating efficient access to healthcare services. This initiative by the government aims to streamline healthcare access and ensure timely medical assistance for all citizens. The ABHA card, provided free of cost and offering coverage of up to 5 lakhs in empanelled state government and private hospitals, serves as a crucial tool. Its unique 14-digit identifier, the ABHA E card, facilitates online healthcare access, digital health records, efficient tracking of medical history, inclusivity, and enables healthcare professionals to make informed decisions by integrating Aadhaar credentials with healthcare services in India.

We extend an invitation to students to actively participate in this awareness program. Your presence and involvement will play a significant role in spreading awareness and nurturing a culture of health and well-being within our community.
