Report on Awareness and Sensitization Program on Cervical Cancer

The **Department of Biosciences, Integral University**, in collaboration with the **National Service Scheme (NSS)**, organized an **awareness and sensitization program on Cervical Cancer** at **Paikaramau village** on **25th April 2025**. The main objective of the activity was to spread awareness about cervical cancer, its causes, symptoms, preventive measures, and the importance of early diagnosis and treatment. It also aimed to inform the community, especially women, about available government schemes and healthcare services for screening and treatment.

Approximately **70 students** from various undergraduate and postgraduate courses actively participated in the program along with faculty members **Dr. Jahanarah Khatoon (Faculty coordinator)** and **Dr. Mohd Aamir Qureshi**. They engaged in **door-to-door visits** across Paikaramau Village personally interacting with residents.

Their efforts included educating the community on the importance of regular health check-ups and HPV vaccinations, explaining the early warning signs of cervical cancer and the importance of early detection, distributing informative pamphlets in the local language for enhanced comprehension, highlighting government initiatives such as free cervical cancer screenings available through various health schemes (**e.g., Ayushman Bharat, National Health Mission programs**) and encouraging women to utilize medical services at **Primary Health Centers (PHCs) and Community Health Centers (CHCs)**.

The program received enthusiastic participation from the local community particularly among women, who expressed appreciation for the initiative and a strong interest in attending such events in future. The active participation of students and the positive feedback from villagers rendered the initiative significantly impactful.
