AWARENESS THROUGH THE SCREENING OF WETLAND DOCUMENTARY” by DEPARTMENT OF ENVIRONMENTAL SCIENCE on “WORLD WETLAND DAY

The **Department of Environmental Science** successfully organized Screening of wetland documentary on 02nd February 2026, aimed to create knowledge and awareness about wetlands. The documentary highlights the Ramsar sites declared in India, their conservation, plant and animal species.

The short film titled “**Ramsites in India**” highlights the majestic wetlands of India which includes lakes, mangroves, estuaries and floodplains. The students get aware about the importance and crucial role of wetlands. The documentary shows that wetlands regulate the water cycle, recharge ground water, control flood, purify water, store plant genetic material vital for food security. The film concludes by India’s commitment to wetland conservation evident through numerous initiatives.

The documentary was shown in all EVS classes, B.Sc. & M.Sc. Environmental Science on their respective classes schedule. The event was coordinated by **Dr. Mohd Kashif Khan** and **Dr. Anand Mishra** under the aegis of **Dr Ambrina Sardar Khan** (Head, Department of Environmental Science).

Few Glimpses of the Programme:

Warm regards,
Prof. (Dr.) Monowar Alam Khalid
