

DEPARTMENT OF CIVIL ENGINEERING

CLASSROOM

The Department of Civil Engineering has spacious stepped-floor classroom halls with seating capacity lies between 30 to 60 that have been thoughtfully designed to provide a high-quality learning ambience. Classrooms have been planned in a meticulous way to bring together analysis with action. Moreover, classrooms are augmented with integrated audio-visual teaching aids like green board, projector with display screen, podium and table for Lectures, Presentations and Buzz Sessions. The finest teaching aids and latest multimedia technology enable faculty members to hold interactive teaching sessions with students and make learning a unique experience. The Teaching-Learning pedagogy practiced in the classrooms is Wi-Fi/LAN-enabled. The classrooms have enough space to conduct class group activities to enhance student interaction and confidence.
