

DEPARTMENT OF CIVIL ENGINEERING PG RESEARCH LAB

PG Research Lab is a user amenity in the Department of Civil Engineering that is committed to Post Graduate (M.Tech) students. It spreads over an area of 102 square feet, has seating capacity of 30 users and is extensively utilized for hands- on- training and research purposes of post graduate students. Lab is fully air-conditioned and is equipped with projector and internet facility.

P G Research Lab is equipped with 20 latest desktop computers. Each system is installed with Windows 10. For uninterrupted power supply, lab is equipped with 100 KVA UPS. The lab enables users to perform general computing tasks, such as word processing and Internet surfing as well as more advanced computing required for course work and research. The lab has common software like Anaconda, Primavera, MS-Excel, Acrobat Reader installed on each system. Lab is resourced with completed thesis and technical books that will aid further research work. Books, thesis, are stored in glass framed almirah for easy access.

Students have entire lab at their disposal to carry out their research work with high-speed internet connectivity to help them accomplishing their research objectives. All the required software is installed with antivirus with periodic updates. Maintenance of laboratories is at a high priority for the department.
